

SYMMON JARED GAGARING

Aspiring Software Engineer | Aspiring Full-Stack Developer

Philippines | symmonjaredgagaring@gmail.com | [linkedin.com/in/symmongagaring](https://www.linkedin.com/in/symmongagaring) | github.com/SyJared | 09621204257

PROFESSIONAL SUMMARY

Recent BS Information Technology graduate with hands-on experience designing and developing full-stack web applications using ASP.NET Core, React, Node.js, Express.js, PostgreSQL, and MySQL. Experienced in building secure REST APIs, implementing JWT authentication and role-based authorization, designing relational databases, and developing responsive user interfaces. Passionate about software engineering, continuous learning, and building practical applications that solve real-world problems.

TECHNICAL SKILLS

Languages: C#, JavaScript, TypeScript, Python, SQL, Java (Basic)

Frontend: React, React Router, HTML5, CSS3, Tailwind CSS

Backend: ASP.NET Core Web API, Node.js, Express.js, REST APIs

Database: PostgreSQL, MySQL, Entity Framework Core

Authentication & Security: JWT Authentication, Role-Based Authorization, bcrypt, Zod Validation

Tools & Technologies: Git, GitHub, Docker (Basic), Linux (Basic), AI-assisted Development

Machine Learning: NumPy, Pandas, Scikit-learn

PROJECTS

School Management System — ASP.NET Core, React, PostgreSQL, Entity Framework Core — Personal Project

- Developed a full-stack school management system supporting Admin, Teacher, and Student roles.
- Implemented JWT authentication and role-based authorization for secure access control.
- Built classroom, student, attendance, and grading management modules.
- Designed RESTful APIs using ASP.NET Core and Entity Framework Core with PostgreSQL.
- Implemented attendance editing, class completion workflow, and student profile management with profile image uploads.
- Developed separate dashboards and functionality for teachers and students using React and React Router.

Flow – Team Workspace Application — React, Node.js, Express.js, MySQL, Python — Personal Project

- Built a collaborative workspace application supporting multiple workspaces and task boards.
- Implemented task assignment, workspace management, and JWT-secured authentication.
- Designed RESTful APIs with middleware validation and secure password hashing using bcrypt.
- Developed a Python recommendation prototype using historical task data to suggest suitable task assignees.

DigiBarangay — React, Node.js, Express.js, MySQL — Capstone Project

- Developed a community management platform with online document requests and announcements.
- Implemented authentication and role-based access for administrators and residents.
- Designed and managed a relational database for community records and transactions.

EDUCATION

Bachelor of Science in Information Technology — ACTS Computer College 2022 – 2026

Senior High School – STEM — Paete Science and Business College

LANGUAGES

- Filipino (Native)
- English (Professional Working Proficiency)
